Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 52 and 53 are rejected under 35 U.S.C. 102(e) as being anticipated by Li, 6,180,348.

Li discloses a device comprising:

a vessel (i.e., centrifuge tube, col. 6, line 26);

a plurality of sensor beads (TentaGel beads, col. 5, line 67, and magnetic beads, col. 6, line 4) located within said vessel to form interstitial spaces therethrough;
and

a plurality of biomolecules (i.e., target molecule in col. 6, line 3) bound to at least a portion of said plurality of beads, each of said biomolecules having a fluorescent tag (col. 6, lines 32-33).

Allowable Subject Matter

Claims 1-16 and 18-27 are allowed. The following is a statement of reasons for the indication of allowable subject matter: the prior art does not teach a single vessel having beads formed of two different types of materials and wherein at least two different kinds of biomolecules, which are fluorescently tagged, are bound each to a respective type of said at least two different types of beads.

Response to Arguments

Applicant's arguments with respect to claims 52 and 53 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Margel, 4,624,923, discloses repeating an assay substituting beads of one type of material for another type (col. 10, lines 45-50.)
